

PRODUCT DESCRIPTION

R1100

MOBILE TRACK-MOUNTED IMPACT CRUSHER

Inlet opening

1100 x 720 mm / 44" x 29"

Performance

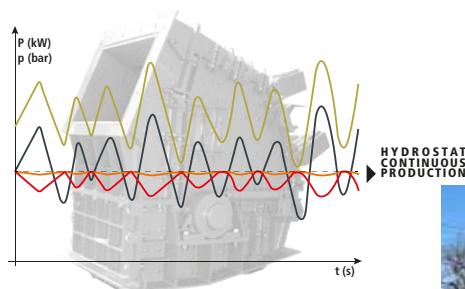

bis zu 380 t/h / 420 st/h*

Weight

32,9 t / 72.600 lbs

Continuous power to the rotor, independent from the engine, for constant crushing performance.

Rockster's hydrostatic drive makes sure that the engine runs in optimum rpm independent from the rotor.

Compact, mobile & easily moved on the construction site even in residential areas. Less down-time.

CONSTANT PERFORMANCE

HYDROSTATIC DRIVE

MAXIMUM FLEXIBILITY

INCREASED MOBILITY

LONG-TERM RELIABILITY

EASE OF OPERATION

Optimal transport dimensions for fast loading and unloading of the crusher.

Quality parts from leading component manufacturers.

Intuitive easy-to-use central machine control unit with a radio remote control.

APPLICATION AREAS

R1100

Perfect cubic final grain

COMPACT. FLEXIBLE. POWERFUL.

The mobile **impact crusher R1100** is specially developed for applications where space is limited such as for inner-city projects.

Because of its optimal dimensions, the R1100 is easily transported from one jobsite to another. It is the perfect combination of compactness and maximum performance.

Rockster's mobile track-mounted impact crusher is based on a fully hydraulically concept, which allows flexible recycling of asphalt, concrete and demolition debris.

Besides previously mentioned materials, the R1100S is also suitable for precise processing of natural stone.

R1100 - your reliable, compact solution for recycling and crushing of:

CONCRETE

Recycled concrete blocks 0/16

C&D WASTE

Subbase road 0/32

ASPHALT

Road 0/32

BRICK

Refilling pipelines 0/64

VIRGIN STONE

Forest road 0/32

SCAN & WATCH

„In 2016, we were looking for a reliable and powerful crusher because our demolition and recycling business has been growing fast. After testing a few machines from different manufacturers and checking Rockster references, we decided to purchase the R1100D. It was simply the right machine for our needs when it comes to crushing rubble, asphalt and limestone,“ says business owner Josef Mayrhofer.

Josef Mayrhofer, CEO
Mayrhofer Erdbewegungen, Austria

„The handling of hydrostatic drive is simple and the output is remarkable“

Iurii Lisnichenko, CEO
CSB, Morocco

SCAN & WATCH

„We are convinced in the robustness and longevity of these impact crushers and have therefore this time invested in a larger impactor, R1100S from Rockster“

Al Hassane Sienou, CEO
Tropic Mining & Quarry, Burkina Faso

SCAN & READ

MAIN DIMENSIONS

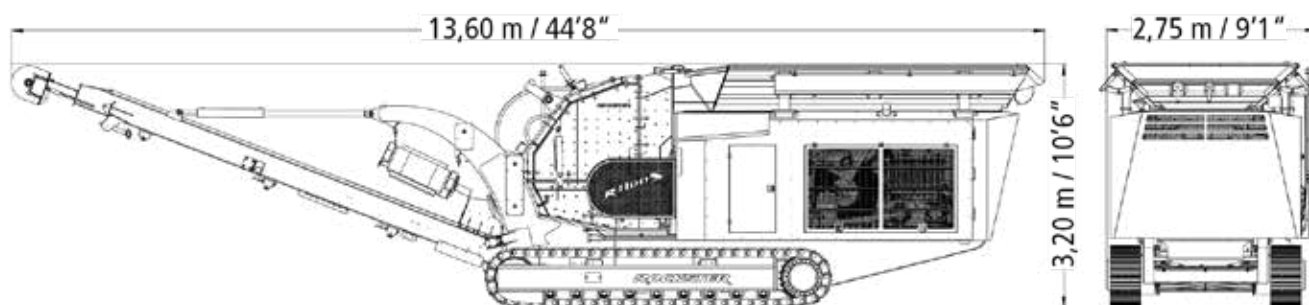

Transport dimensions

Length:	44'8" / 13,60 m
Width:	9'1" / 2,75 m
Height:	10'6" / 3,20 m
Weight:	72.600 lbs / 32,9 t

Feeding & discharge height

Feeding height:	10'6" / 3,20 m
Main discharge belt:	~ 11'6" / 3,50 m
Side discharge belt:	~ 7'10" / 2,40 m

Technical details

Inlet opening:	44" x 29" / 1100 x 720 mm
Impact circle diameter:	40" / 1020 mm
Rotor equipment:	4 blow bars
Crushing ration:	1:10 - 1:50
Performance:	up to 380 t/h / 420 st/h
Rotor speed (continuously adjustable):	up to 850 rpm
Weight:	22,500 lbs / 10.200 kg
Drive:	hydrostatic
Gap adjustment (adjusted on display):	fully hydraulic
Dust suppression:	At the crusher inlet & outlet

1. Maximum flexibility for top performance

The Rockster impact crusher guarantees the highest performance with a very high crushing rate. With two hydraulically fully adjustable aprons working independently from one another, as well as the option to variably adjust the crusher speed, the size of the final product can be highly optimised.

2. Individual adjustment of the degree of hardness

Depending on the material being processed, the hardness of the blow bars can be individually selected. This ensures optimal performance in various working conditions.

3. Use of the blow bars on both sides

The Rockster impact crusher's blow bars can be used on both sides, which extends the life of the wearing parts and at the same time reduces maintenance intervals.

4. High quality wear materials

Rockster uses only high-quality wear materials. This not only ensures low wear, but also ensures a reduction in daily operating costs.

Drive unit

Engine (electronically regulated):	CAT Stage V - 280 kW / 375HP
Cylinder:	6
Cooling system:	water

The drive system is located at the rear of the machine, enclosed in a sound-proofed housing. Engine openings are positioned on all sides for easy access, service and overall maintenance.

The hydraulic pump for all auxiliary drives (main discharge belt, side discharge belt, vibration chute, crawler gear...) as well as the pump for the hydrostat are driven via a distributing gear unit which is flange-mounted on the drive engine. The hydrostat activates the crusher via a V-belt drive.

ADVANTAGES OF THE HYDROSTATIC DRIVE

- > Elimination of conventional clutch. No wear.
- > Individual adjustment of crusher speed
- > Crusher overload protection
- > Power adjustment according to individual requirements
- > Uniform throughput
- > Enormous power reserves

Feed hopper

Material:	Hardox 400
Volume:	6.5 yd³ / 5 m³
Length:	14'6" / 4400 mm
Width:	8'2" / 2500 mm
Height:	10'6" / 3200 mm

Vibration chute with 2-deck pre-screening

Material:	Hardox 450
Length:	5'11" / 1800 mm
Width:	3'7" / 1100 mm
Type:	Zig zag
Option:	bar screen
Drive:	hydraulic - with load-dependent speed control Overload protection

Bypass

The switchable chute (Bypass) enables the discharge of pre-screened material on the side or onto the main discharge belt.

Easy switch via hand lever.

No special assembly necessary.

No wear. No service.

Main discharge belt

Belt width:	47" / 1200 mm
Discharge height:	~ 11'6" / 3,5 m
Angle:	25°
Drive:	hydraulic, continuously variable

The main discharge belt is hydraulically lowerable for maintenance and service purposes.

Side discharge belt

Belt width:	26" / 650 mm
Discharge height:	~ 7'10" / 2,4 m
Angle:	20°
Drive:	hydraulic

The side discharge belt is hydraulically foldable for transport purposes.

Magnetic separator - adjustable height

Type:	Permanent magnet
Belt width:	30" / 750 mm
Weight:	2570 lbs / 1165 kg
Drive:	hydraulic

Caterpillar crawler

Tread width:	16" / 400 mm - slanted
Wheel base:	12'6" / 3800 mm
Surface:	trippel ribbed pads
Drive:	2-speed hydraulic

Control panel

Central control/operating unit ensures an easy operation and machine monitoring in connection with a wireless remote control.

Fully automatic engine Start-Stop system with only one button.

- › Save the operation settings for various applications
- › Error monitoring - error log
- › Input & output status
- › Fast start of operation (QUICKSTART-Function)

Ideal accessibility

Large covers enable optimal accessibility when it comes to service and maintenance. Furthermore they ensure optimal ventilation of the drive-unit and the cooler. It makes it a dream for every service technician when it comes to service and maintenance.

OPTIONS

Central lubrication system

Belt weigh scale incl. printer

Air compressor

Water pump

Blow-bar change system

Dust suppression

OPTIONS - SCREENING SYSTEM

R1100

Defined final product

Compact circular vibrating screen RS114S.

Double-functional return or stockpile belt RB95.

Perfect addition for the production of 100 % defined final product.

In addition, the return belt can be used as a stockpile belt, which enables the production of the second product.

Vibrating screen - lowerable

Screen size:	10'2" x 4'5" / 3100 x 1350 mm
Standard mesh:	1 1/2" / 38 mm

Special screens available on demand

The hydraulically lowerable screen box saves time and unnecessary costs during maintenance.

Discharge conveyor - fines

Belt width:	3'11" / 1200 mm
Discharge height:	~ 9'11" / 3,0 m

Discharge conveyor - oversize grain

Belt width:	24" / 600 mm
-------------	--------------

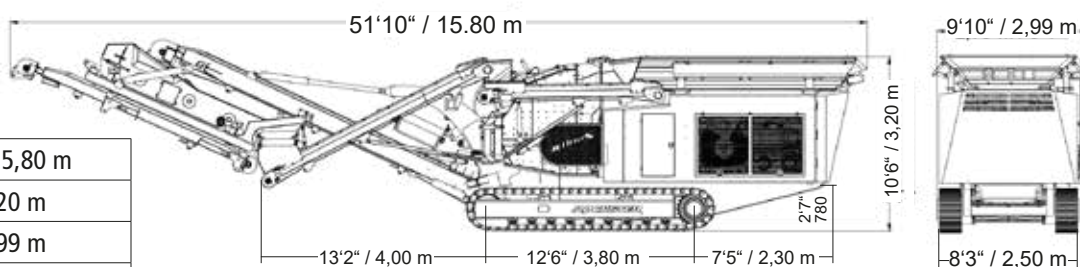

RB95 return or stockpile belt

Belt width:	24" / 600 mm
Discharge height (main conveyor):	~ 12' / 3,6 m

Transportabmessungen R1100 + RS114S + RB95

Length:	51'10" / 15,80 m
Height:	10'6" / 3,20 m
Width:	9'10" / 2,99 m
Weight:	81,800 lbs / 37,1 t

OPTIONS - AIR BLOWER

R1100

FOR A CLEANER AND HIGHER QUALITY FINAL PRODUCT

RVB1700

The Rockster Air blower RVB1700 is used to efficiently separate non-aggregates from the final end-material, which results in a cleaner and higher quality final product. This enables Rockster customers to work more environmentally friendly and economically.

The Rockster RVB1700 air blower is hydraulically operated and can be completely integrated onto every Rockster crusher. The centerpiece of the RVB1700 is a variably adjustable blower, which is connected by flexible hoses to the air nozzle, which has an adjustable angle.

Through the narrow slot of the air nozzle, the air emerges and blows diagonally from below through the crushed material, so that the unwanted lightweight materials such as polystyrene, styrofoam, textile, cardboard, gypsum, plastic, foil, wood, are removed. With relatively little effort, the required final products can have a significantly higher value.

The RVB1700 was also developed as a retrofit kit for Rockster mobile crushers.

Technical details

Air volume:	up to 1.700 m ³ /h / 2,223 yd ³ /h
Differential pressure:	up to 7.000 Pa
Drive power:	up to approx. 15 kW / 20 hp
Drive - rpm:	up to 3.200 min ⁻¹
Weight:	approx. 150 kg / 331 lbs

GENERAL INFORMATION

Austrian based manufacturer Rockster Austria International GmbH has a longstanding reputation and the know-how in demolition and screening industry.

The product line includes, among others, track mounted impact and jaw crushers, screening machinery and tracked stackers. "Our mobile crushers and screeners are used for profitable & economical recycling and processing of asphalt, concrete and construction waste, as well as for natural stone.

With innovations like The Original DUPLEX system or double-functional return belt, we repeatedly demonstrate our progressive approach towards improving and developing more efficient recycling & processing methods."

Rockster machines are sold in more than 50 countries worldwide. Our sales partner network guarantees the ideal on-site package of product and service in order to support and secure the daily success of our customers.
